RECOMMENDED ASSESSMENT METHODS

Some of the following suggested assessment methodologies could be adopted;

- ❖ The oral and written examinations (Scheduled and surprise tests),
- ❖ Practical assignments and laboratory reports,
- ❖ Efficient delivery using seminar presentations,
- ❖ Viva voce interviews.

Note:

1. The duration of the examination for each theory course is 3.00 hrs.
The duration of each practical examination is 3 hrs with 50 marks
2. Each course in theory is of 100 marks and practical course is of 50 marks.
 - Semester End University Examination in Theory Course: 75 marks [External evaluation]
 - Mid-Semester Examination in Theory Course at the college level: 25 marks [Internal evaluation]
3. The University (external) examination for Theory and Practical shall be conducted at the end of each Semester.
4. In each semester the evaluation in Practical courses shall be done by an external examiner appointed by the University.
There shall not be Internal valuation in any semester end practical examinations.
5. The candidate shall prepare and submit at the time of practical examination a certified Record based on the practical course with a minimum of **6** experiments from each semester.
6. Numerical Problems must be solved at the end of every chapter of all Units.
7. Numerical problems, each having a weightage of 4 marks, should be asked in the Semester end University examinations.
8. The minimum passing marks in each theory course is 40 (External:30 and Internal:10)
The minimum passing marks in each Practical/Lab course is 20.
9. The teaching work load per week for semesters I to IV is 4 hours for theory course and 2 hours for all laboratory (practical) courses.

10. Visits to industry, national research laboratories, and scientific exhibitions should be encouraged.
11. The syllabus for Practical courses is same for both Mathematics and Non-Mathematics combinations.
12. The marks distribution for the Semester End practical examination is as follows:

<i>(i) Formula/ Principle / Statement with explanation of symbols and</i>	05
<i>(ii) Diagram/Circuit Diagram / Tabular Columns</i>	10
<i>(iii) Setting up of the experiment and taking readings/Observations</i>	10
